

## STATEMENT CONCERNING GLUTEN

It is the intent and the business choice of Alpro to meet the specific requirements for people intolerant to gluten.

Therefore, Alpro has reviewed the gluten status of all its ingredients and finished products in accordance with the European Commission Regulation (EU) 1169/2011 of 25 October 2011. All data are integrated in a overall product database system, which enables us to provide fast and accurate information when needed.

Alpro and Provamel products (that may or may not contain a claim "glutenfree") are compliant to the European Regulation (EU) 1169/2011 and for this purpose, Alpro has established all necessary procedures in a cross contamination prevention program to obtain finished products at concentrations of less than 20 mg/kg (20 ppm).

Only following Alpro and Provamel products delivered to Leader S.A. contain more than 20 ppm gluten, namely

- Alpro oat drink
- Provamel oat drink

Therefore the labelling, advertising and presentation of Alpro and Provamel products (with the exception of the Alpro and Provamel oat drink) may bear the term "gluten free" in accordance with the European Regulation (EU) 1169/2011.

To assure at any time this gluten-free status of the Alpro and Provamel products (with the exception of the Alpro and Provamel oat drink) appropriate actions are taken and preventive programmes are in place and validated to exclude any potential gluten-contamination during the screening process of ingredients as well as during the processing of our products. These procedures are integrated in our HACCP system, which is evaluated on a regular basis.

We would like to emphasize that the Alpro and Provamel oat drink contain gluten.
